Dandan Liu

Academic CV

PhD Candidate in Media and Communication, Universiti Malaya
Expected graduation: May 2027 · Kuala Lumpur, Malaysia

todandan@foxmail.com · Academic website · ORCID: 0009-0002-4702-8070

Academic focus: Computational Communication and Human–AI Communication

Education

PhD Candidate, Media and Communication 2021–May 2027 (expected)
Universiti Malaya, Faculty of Arts and Social Sciences.
Thesis: *Semantic Governance and Crisis Framing in China's COVID-19 Press Conferences 2020–2023*.

MA, Journalism and Communication 2016–2018
Fudan University, School of Journalism.

BA, Journalism 2010–2014
Fudan University, School of Journalism.

Research Profile

My research examines public discourse, human–AI communication, and trust on digital platforms. Combining communication theory with qualitative and computational approaches, I study how platform interventions shape interaction and how institutions frame public health crises.

Themes: Human–AI interaction · Platform governance and trust · Crisis framing

Selected Research and Contributions

First-author research led by Dandan Liu; detailed roles below follow published contribution statements where available. IDs refer to the complete list.

From Solo Post to Shared Space [J1]

ACM Transactions on Social Computing (2026). Led the research on how a public LLM agent reshapes human-to-human conversation. The study uses reply-network analysis, matching, and doubly robust estimation to examine interaction structure on a social platform.

"Fairness Labels" in Feeds [J2]

Social Media + Society (2026). Led research using an online randomized experiment to examine creators' fairness and legitimacy judgments. Documented contributions include study design, software, investigation, data curation, formal analysis, visualization, and drafting and revising the manuscript.

From zero-COVID to global alignment [J5]

Globalization and Health (2025), Brief Report. Led the research examining 154 press-conference transcripts through topic modeling, frame analysis, and process tracing. The published statement records equal contributions by all three authors to conception, design, analysis, and writing.

Digital duality [J6]

Information, Communication & Society (2025). Led an interview-based study of how rural housewife Douyin creators negotiate tradition, modernity, and identity.

Courses Prepared to Teach

Computational Communication · Communication Research Methods · Human–AI Communication. Prospective teaching areas; these are not listed as previously taught courses.

Methods in Published Research

Experimental design, data curation, software implementation, and statistical analysis [J2]; qualitative study design, interview-based investigation, and multi-source data collection [J4]; collaborative mixed-methods analysis of crisis discourse [J5]. These descriptions reflect documented contributions, not teaching experience or project leadership.

Published and Online-First Journal Articles

J = journal article; bold names identify Dandan Liu. First authorship applies to J1–J6. Journal articles, accepted work, proceedings papers, and other conference records are listed separately.
