RESEARCH INTERESTS

Computational Communication · Social Media
Crisis Communication · Human–AI Interaction
Digital Discourse and Media Dynamics

Research Profile

I study how digital platforms shape public discourse and human interaction. Combining qualitative and computational approaches, my research examines social media, crisis communication, and everyday encounters with AI.

Research Themes

Digital discourse and crisis communication. Pandemic communication, transnational influences, and the relationships between government messaging, social media, and public discourse.

Human–AI communication. Public LLM agents, emotional support and authenticity, and the changing structure of human-to-human interaction on social platforms.

Platform governance and trust. Fairness disclosures, content provenance, user choice, and the authority of AI-generated summaries and wearable wellness scores.

Education

PhD Candidate, Media and Communication 2021–2026 (expected)
Universiti Malaya, Faculty of Arts and Social Sciences.

MA, Journalism and Communication 2016–2018
Fudan University, School of Journalism.
Thesis: *The Media Properties and Community Properties of "Logical Thinking".*

BA, Journalism 2010–2014
Fudan University, School of Journalism.
Thesis: *Research on the Use and Satisfaction of College Students' Mobile News App in China*.

Research Skills and Academic Recognition

Approaches and tools: Qualitative inquiry; computational communication; Python.
Languages: Mandarin (native); English (IELTS 6.5).
Honor: Second Prize, People's Daily Online Excellent Paper Award (bachelor's thesis).
